

Air Flow Sensor

Monitor air flow stopping or starting from vents or fans via your Room Alert monitor.

NC RMA-AF1-SEN
NO RMA-AF2-SEN

We've got facilities covered.

The Air Flow Sensor provides real-time recognition of air flow stoppage via the switch sensor channels on your Room Alert monitor. Monitor HVAC ducts, fans and more to prevent air flow problems in your facility. This sensor is available in Normally Open (NO) and Normally Closed (NC) versions so you can use the best option for your specific application. For more information and specifications, please visit AVTECH.com.
