# Plugin Bundles For Device *ManageR* ™

## Easy-To-Use Plugins Enhance The Capabilities Of AVTECH's Device ManageR

### Plugin - Windows Bundle (Shutdown, Reboot, Log Off & Script)    ADM-WINB-PAS

- **Shutdown Windows Systems Remotely Across The Network.** When used with Device ManageR, this plugin will perform a forced power-down of the target system. Use it to shutdown an unlimited number of Windows systems across the network... individually, in groups, simultaneously, sequentially or according to a defined schedule. Shutdown systems without any user interaction both automatically and immediately to save equipment from damage due to environment extremes.

- **Reboot Windows Systems Remotely Across The Network.** When used with Device ManageR, this plugin will perform a forced reboot of the target system. Use it to reboot an unlimited number of Windows systems across the network... individually, in groups, simultaneously, sequentially or according to a defined schedule. Monitoring a system or device via a Ping Object? Use the 'Reboot Action' to restore the service being monitored if/when it stops responding.

- **Log Off Windows Systems Remotely Across The Network.** When used with Device ManageR, this plugin will perform a forced log off of the target system. Use it to log off an unlimited number of Windows systems across the network... individually, in groups, simultaneously, sequentially or according to a defined schedule. Issue log off responses for security, to manage power consumption or more from anywhere in the world by using Device ManageR's easy-to-use web browser interface.

- **Execute Windows Commands, Batch Files Or VBScripts.** When used with Device ManageR, this plugin will allow users to execute Windows commands, batch files or VBScripts when alerts are detected. Each instance of the Windows Scripting action will be able to perform one method at a time, however there are no limits on the number of instances that can be created.

- **Perform Windows Audible Actions.** When used with Device ManageR, this plugin will allow users to speak alert text or play a sound file over the Device ManageR host system's sound card. Use this plugin to notify managers and staff immediately when events occur or issues are resolved.

### Plugin - Dial Out Bundle (GSM, Text & Voice)    ADM-DOB-PAS

- **Send Text Messages To Mobile Devices Via A GSM Modem Or Phone.** This plugin action will use a GSM modem or phone connected to the Device ManageR host system to send a text message to configured contacts when issues or events occur across the network. Use it to send text messages to an unlimited number of contacts... individually, in groups, simultaneously, sequentially or according to a defined schedule. Send notifications both automatically and immediately to save equipment from environment extremes.

- **Send Text Messages To Mobile Devices Through A Modem Via TAP Service, Or Dial A Phone Directly To Play Dial Tones.** This plugin can be used to call/text an unlimited number of phones... individually, in groups, simultaneously, sequentially or according to a defined schedule. Receiving phones can set a customized description or name for the dial out line for easy installation, such as "Device ManageR" or "Data Center Alert". Send notifications both automatically and immediately to save equipment from environment extremes.

- **Dial A Phone Directly To Play Voice Messages.** This plugin can be used to dial a phone directly and play voice messages to an unlimited number of phones... individually, in groups, simultaneously, sequentially or according to a defined schedule. Send notifications both automatically and immediately to save equipment from environment extremes.

### Plugin - Report Generator    ADM-REP-RAS

- **Automatically Generate And Email Scheduled Status Reports.** When used with Device ManageR, this plugin allows users to schedule and send emails to configured contacts with status updates and advanced statistics on discovered devices (Room Alert & TemPageR), alerts detected by Device ManageR and more. View and print status and/or statistics for selected environmental sensors within computer rooms, data centers and other facilities. Keywords are available that allow users to insert real-time values for the number of alerts in progress, number of alerts in a designated time period, number of devices discovered, current sensor readings and much more. An unlimited number of reports can be created, allowing users the flexibility to create different reports for different contacts, or to generate reports according to different schedules (i.e. periodic, daily, weekly or monthly report) or facilities.
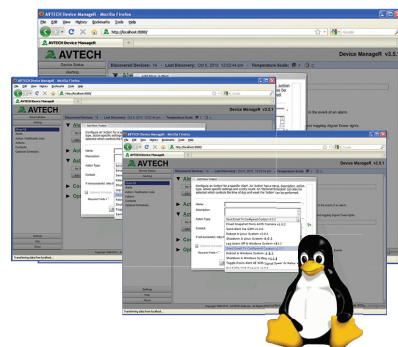

# Plugin Bundles For Device *ManageR* ™

## Plugin - Unix/Linux Bundle (Shutdown, Reboot & Commands)    ADM-UNLB-PAS

- **Shutdown Unix/Linux Systems Remotely Across The Network.** When used with Device ManageR, this plugin will perform a forced power-down of the target system. Use it to shutdown an unlimited number of Unix/Linux systems across the network... individually, in groups, simultaneously, sequentially or according to a defined schedule. Shutdown systems without any user interaction both automatically and immediately to save equipment from damage due to environment extremes.

- **Reboot Unix/Linux Systems Remotely Across The Network.** When used with Device ManageR, this plugin will perform a forced reboot of the target system. Use it to reboot an unlimited number of Unix/Linux systems across the network... individually, in groups, simultaneously, sequentially or according to a defined schedule. Monitoring a system or device via a Ping Object? Use the 'Reboot Action' to restore the service being monitored if/when it stops responding.

- **Execute Unix/Linux Commands.** When used with Device ManageR, this plugin will allow users to execute Unix/Linux commands when alerts are detected. This action will be able to perform the configured command on the target system by connecting directly via Telnet.

## *Plugins To Enhance Device ManageR Are FREE With GoToMyDevices Professional Or Higher...*

Device ManageR is AVTECH's all-in-one solution for the discovery, management, monitoring, alerting, logging, graphing, automatic action and more of AVTECH's Room Alert IT & facilities environment monitoring hardware and Axis network cameras. Device ManageR greatly enhances the value of AVTECH's product line, making it easier for users with multiple Room Alert units to monitor and document environment conditions, improve reliability, and decrease unplanned downtime or costly hardware replacement.

Device ManageR Plugins are available for AVTECH's Device ManageR software (v3.0.1 and up). They include plugins for Windows, Unix/Linux, Dial Out and Reporting to provide a complete solution for any IT and facility environment monitoring requirement.

These plugins are ideal for use when conditions in a data center environment turn fatal for computer systems and other expensive IT equipment such as extreme temperature, extreme humidity, main power loss, flood, smoke/fire, security break-ins and other conditions. Device ManageR can perform these actions in real-time without any user interaction both automatically and immediately, saving expensive equipment from damage caused by environment extremes that go unchecked.

Use of plugins can easily be expanded beyond the computer room to all types of facilities where Device ManageR can keep managers informed and automatically use relays built into the Room Alert 32E/W, Room Alert 12E/E or Relay Switch Sensor to turn on/off backup HVAC units, fans, pumps, lights, alarms and more. These actions can be enabled as an automated response to an environmental condition changing status as indicated by other sensors anywhere on the network. For users that want the power of plugins, although still choose to make the final decision, they can log into Device ManageR through it's web browser interface and interactively take an action at the time of their choosing from anywhere in the world.

AVTECH's Device ManageR software comes 'FREE' with the purchase of any Room Alert IT & facilities environment monitor. The Device ManageR Plugins are available for 'FREE' download by customers with an active service subscription to GoToMyDevices at the Professional tier or higher. If you are a new Room Alert user and still running under the bundled Personal service, you can easily upgrade by logging into GoToMyDevices, then select the Subscription page and follow the instructions to upgrade online. Once enabled for Professional service or higher, click the Downloads page and download the current version of any AVTECH software or plugin. Maintaining active service is important because enhancements and updates are made on a regular basis. Running the latest version of AVTECH software is the number one way to keep Room Alert monitors running without interruption for the long term.

**Plugins For AVTECH's Device ManageR Application Enhance The Capabilities, Ease-Of-Use and Overall User Experience While Working With Room Alert Monitors.**
