

TemPageR Sample Layout

(A) TemPageR monitors from AVTECH allow dynamic monitoring of temperatures in your computer room or other facility from anywhere.
 (TemPageR - \$195... Includes hardware, software, documentation, 12 months of Maintenance, Support & Update Service (MSUS). Rack model - \$225.)

(B) Connect TemPageR monitors anywhere there is an Ethernet connection available.

(C) Internal firmware and bundled Device Manager software allow users to monitor, log, graph, send alerts, take automatic corrective actions and more. Monitor TemPageR units via your web browser from anywhere worldwide.
 (No host PC required... Device Manager plugins allow shutdown, reboot and/or log off capabilities for Windows and Unix/Linux systems, dial out alerting, advance reporting and more.)

(1) A built-in Digital Temperature Sensor allows users to monitor the ambient temperature at the location of the TemPageR monitor.

(2) AVTECH's Digital Temperature Sensor placed in or at any primary outflow vent for the main HVAC unit allows monitoring of the air temperature as it enters the room. This is normally where the first indication that an HVAC system has failed or is failing, will occur.
 (AVTECH's Digital Temperature Sensor w/ 25' cable - \$25; can be extended up to 100'.)

(3) AVTECH's Digital Temperature Sensor placed inside a rack or near a cabinet fan monitors air temperature near critical servers, switches or disk storage systems.
 (AVTECH's Digital Temperature Sensor w/ 25' cable - \$25; can be extended up to 100'.)

(4) IT or facilities managers and staff rest easy knowing they will be notified by TemPageR whenever temperature extremes threaten the data center, uptime or valuable equipment.
 (Peace Of Mind is PRICELESS... Order TemPageR today for just \$195. Rack model \$225.)
