

Axis Network Cameras (Recommended)

Easy-To-Use Axis Network Cameras Enhance Your Physical Environment Monitoring

Axis M1011 Network Camera

AX-M1011-CAM **\$179**

Considered best in its class with superior image quality and high-performance compression and streaming capabilities. Perfect for indoor surveillance in smaller locations such as computer rooms, data centers, boutiques, restaurants, hotels, residences and more. Built-in video motion detection and support for advanced event alerting and more through AVTECH's Device Manager.

- 1/4" Progressive scan RGB CMOS sensor.
- Up to 30 frames per second in all resolutions ranging up to 640x480.
- Supports simultaneous H.264, Motion JPEG, MPEG-4 video streams for optimization of image quality and bandwidth.
- Built-in web server and video motion detection with pre- and post-alarm buffers.
- Scheduled and triggered event functionality with alarm notification via e-mail, TCP, HTTP and more.
- Multi-user level password protection for restricted access, IP address filtering and HTTPS encryption.

Axis M1011-W Network Camera

AX-M1011W-CAM **\$199**

Small and functional with superior image quality and high-performance compression and streaming capabilities. Perfect for indoor surveillance in smaller locations such as computer rooms, data centers, boutiques, restaurants, hotels, residences and more. Can be configured both wireless (IEEE 802.11g) and wired connection with built-in video motion detection and support for advanced event alerting and more through AVTECH's Device Manager.

- 1/4" Progressive scan RGB CMOS sensor.
- Up to 30 frames per second in all resolutions ranging up to 640x480.
- Supports simultaneous H.264, Motion JPEG, MPEG-4 video streams for optimization of image quality and bandwidth.
- Built-in web server and video motion detection with pre- and post-alarm buffers.
- Scheduled and triggered event functionality with alarm notification via e-mail, TCP, HTTP and more.
- Multi-user level password protection for restricted access, IP address filtering and HTTPS encryption.

Axis M1031-W Network Camera

AX-M1031W-CAM **\$279**

Small and functional with superior image quality and high-performance compression and streaming capabilities. Perfect for indoor surveillance of smaller locations such as computer rooms, data centers, boutiques, restaurants, hotels, residences and more. Can be configured both wireless (IEEE 802.11g) and wired connection with built-in video motion detection, audio detection and support for advanced event alerting and more through AVTECH's Device Manager. Passive Infrared (PIR) sensor with automatic LED illumination detects movement even in the dark areas.

- 1/4" Progressive scan RGB CMOS sensor.
- Up to 30 frames per second in all resolutions ranging up to 640x480.
- Supports simultaneous H.264, Motion JPEG, MPEG-4 video streams for optimization of image quality and bandwidth.
- Built-in web server, video motion detection with pre- and post-alarm buffers and audio detection.
- Scheduled and triggered event functionality with alarm notification via e-mail, TCP, HTTP and more.
- Multi-user level password protection for restricted access, IP address filtering and HTTPS encryption.

Axis M1103 Network Camera

AX-M1103-CAM **\$349**

Affordable and functional fixed focal lens camera with superior image quality. Perfect for both indoor and outdoor (additional casing required) surveillance in locations such as computer rooms, data centers, boutiques, restaurants, hotels, residences and more. Built-in video motion detection and support for advanced event alerting and more through AVTECH's Device Manager.

- 1/4" Progressive scan RGB CMOS sensor.
- Up to 30 frames per second in all resolutions ranging up to 800x600 with pixel counter.
- Supports simultaneous H.264, Motion JPEG for optimization of image quality and bandwidth.
- Built-in web server, video motion detection with pre- and post-alarm buffers and audio detection.
- Scheduled and triggered event functionality with alarm notification via e-mail, TCP, HTTP and more.
- Multi-user level password protection for restricted access, IP address filtering and HTTPS encryption.

Axis M3203 Network Camera

AX-M3203-CAM **\$399**

Affordable fixed dome camera with superior image quality in SVGA resolution. Perfect for indoor surveillance where discreet and tamper-resistant, fixed domes are required (i.e. computer rooms, data centers, retail stores, banks). Incorporates multiple H.264 streams and/or Motion JPEG streams for different quality needs and bandwidth constraints. Support for advanced event alerting and more is provided through AVTECH's Device ManagerR.

- 1/4" Progressive scan RGB CMOS in SVGA resolution with pixel counter.
- Up to 30 frames per second in all resolutions.
- Supports simultaneous H.264 and Motion JPEG streams for optimization of image quality and bandwidth.
- Built-in web server and video motion detection with pre- and post-alarm buffers.
- Scheduled and triggered event functionality with alarm notification via e-mail, TCP, HTTP and more.
- Multi-user level password protection for restricted access, IP address filtering and HTTPS encryption.

Axis P3301 Network Camera

AX-P3301-CAM **\$599**

Affordable fixed dome camera with superior image quality in both illuminated and low light areas. Perfect for spaces where discreet and compact solutions are desired such as data centers, retail shops, banks and more. Incorporates multiple H.264 streams and/or Motion JPEG streams for different quality needs and bandwidth constraints. Support for advanced event alerting and more is provided through AVTECH's Device ManagerR.

- 1/4" Progressive scan RGB CMOS.
- Up to 30 frames per second in all resolutions.
- Supports simultaneous H.264 and Motion JPEG streams for optimization of image quality and bandwidth.
- Built-in web server, video motion detection with pre- and post-alarm buffers and audio detection.
- Scheduled and triggered event functionality with alarm notification via e-mail, TCP, HTTP and more.
- Multi-user level password protection for restricted access, IP address filtering and HTTPS encryption.

Axis 212 PTZ / 212 PTZ-V Network Camera

AX-212PTZ-CAM / AX-212PTZV-CAM **\$649 / \$699**

Instant, one-click, pan/tilt/zoom for a full overview with superior image quality and wide area coverage. Perfect for indoor surveillance of premises such as computer rooms, data centers, shops, reception areas, banks and more. Built-in video motion detection, integrated two-way audio and support for advanced event alerting and more through AVTECH's Device ManagerR. And it's all done without moving parts, so there's no wear and tear.

- 1/2" Progressive scan CMOS 3.1 Megapixel sensor with advanced video processing.
- Up to 30 frames per second in all resolutions ranging up to 640x480 at maximum zoom.
- Supports simultaneous Motion JPEG and MPEG-4 streams for optimization of image quality and bandwidth.
- Built-in web server, video motion detection with pre- and post-alarm buffers and integrated two-way audio.
- Scheduled and triggered event functionality with alarm notification via e-mail, TCP, HTTP and more.
- Multi-user level password protection for restricted access, IP address filtering and HTTPS encryption.

Axis P5512 PTZ Network Camera

AX-P5512-CAM **\$1099**

Instant, one-click, pan/tilt/zoom dome camera with auto flip for a full overview with superior image quality for both day and night functionality. Perfect for indoor surveillance of premises such as computer rooms, data centers, hotels, retail shops and more. Support for advanced event alerting and more is provided through AVTECH's Device ManagerR. IP51 rated for protection against dust and dripping water.

- 1/4" CCD with pan 360° auto flip, tilt 180° and 12x zoom.
- Up to 30 frames per second in all resolutions.
- Supports simultaneous H.264 and Motion JPEG streams at full frame rate in 4CIF resolution for optimization of image quality and bandwidth in both day/night.
- Built-in web server, video motion detection with pre- and post-alarm buffers and integrated two-way audio.
- Scheduled and triggered event functionality with alarm notification via e-mail, TCP, HTTP and more.
- Multi-user level password protection for restricted access, IP address filtering and HTTPS encryption.
