Corporate Overview: AVTECH Software (AVTECH), a private corporation founded in 1988, is a hardware and software developer and manufacturer, with manufacturing and distribution facilities in Rhode Island, Pennsylvania, and Shannon, Ireland as well as an international sales office in Dubai. Our **Room Alert**® products monitor facilities for conditions such as temperature, humidity, power, flood / water leakage, smoke / fire, air flow, room entry, motion, cameras and more. Alerting, logging and graphing are standard for all models. **Room Alert Manager**™ is AVTECH's 'IT & Facilities Environment Monitoring' software that runs as a Windows Service and will automatically discover units across the network, log and graph sensor data, alert users when environmental events occur or thresholds are passed, and allows reporting, auto response, and more. Automatic corrective actions resolve issues for a lights out response, allowing 'Disaster Prevention' instead of 'Disaster Recovery'. AVTECH's **Room Alert Account**™ dashboard allows users to manage Room Alert monitors through any internet-connected device. This powerful service allows access from anywhere with the same user experience device to device.

Mission Statement: AVTECH's objective is to make the monitoring and management of physical IT & facilities environments easier from anywhere at anytime.

Primary Products:  **RoomAlert**
Advanced Environment Monitors For IT & Facilities Management

Room Alert Manager™
Advanced Management Software For Room Alert Monitors Network-Wide

Room Alert Account™
Easy To Use Online Dashboard For Room Alert Monitors... Anywhere... Anytime

Customers: AVTECH has nearly 200,000 end users located in over 185 countries, including organizations in every industry and on every continent. Room Alert is heavily used by the Fortune 1000, U.S. Government, U.S. Military, and organizations of all types and sizes.

Distribution: AVTECH's products are available worldwide from professional resellers, directly from AVTECH and online at AVTECH.com.
