Wireless Sensor Hub (WiSH) RAW-PWSH-HUB

## Wireless Sensor Hub (WiSH)

AVTECH's Wireless Sensor Hub (WiSH) is used exclusively to transmit sensor data from internal and connected sensors back to your Room Alert monitor and WiSPR Sensors. The WiSH Sensor can be located anywhere monitoring is desired up to almost 250' in ideal conditions from the main unit without running cables. The WiSH Sensor communicates via a secure, private protocol on a ZigBee based 2.4 Ghz wireless connection. Data sent and retrieved is encrypted and will not interfere with other wireless devices. A maximum of ten (10) WiSH and/or WiSPR units allow an additional 40 sensors via wireless.

- Internal Digital Temperature Sensor. Temperature range: -67 – 257° F, -55 – 125° C.
- 2 digital ports, 1 switch sensor channel.
- Max wireless distance from Room Alert or a WiSPR sensor hub is 250'.
- Max 10 WiSH / WiSPR sensor hubs per Room Alert.
- Compatible with Room Alert 32W & 26W; WiSPR sensor hub.
- Includes Wireless Sensor Hub & 5V Power Adapter. Installation Note online from sensor page.
